

VII. CONCLUSION

This **River to Ridge Comprehensive Plan** embodies the County's vision for managing its future during the first twenty years of the 21st Century. Through the action plan policies related to transportation, economic development, housing and neighborhood preservation, and open space and the environment presented here, the Plan establishes a framework intended to guide the actions to be taken by the County and the various municipal governments.

By identifying these policies and strategies, the Plan seeks to enlist the participation and coordination of these various levels of government, other implementing agencies and local citizens to further the goals and objectives of the Plan.

Incremental implementation of small and large Plan policies will have the cumulative long term effect of sustaining the best of the County's natural features, preserving its historic resources and established communities, fostering its economic development and improved transportation systems while improving its built environment to result in an enhanced quality of life for all County residents.
